EAR APART.

Beneath the quiet old bridge you pass,
The waves are murmuring and the grass is green,
And, winding to the elm tree near the pass,
You see the pathway through the grass,
Where we were wont to walk, alas!

The river waters are so old,
Beneath the shade of willow trees;
The sunlit waters gleam like gold,
And ripple to the gentle breeze,
But I am far from them and all is dead.

The sky bends over head and blue,
And in the soft and yellow light,
You tread the lane and to the lake you view,
In former days when days were bright,
Do these days bring such sweet thought?

And still that lane with grass is green,
With fragrant flowers the banks are fair,
In golden gleam and silver sheen
The bees still hum the balmy air,
But you will find it all as there.

Again, perchance, I may see
The smiling face of a willow tree,
Which I saw last year,
For I am far from them and all is dead.

One joy I have to me,
Pass by and for the summer's end,
So do the birds lose heart to sing,
When fading leaves are all around,
And winter is the end of all!

—*Liverpool Advertiser.*

THE SAXON AND ERIN.

The phantom of the past is a matter
Of race and of age. Your Colie birds
Are as the nightingales among birds; theirs
Is the sweetest and most touching of songs,
Ours is a bolder note, but less sweet.

The harp that once thronged Tara's halls,
And

Rail, Britannia, Britannia! the waves!
"Ah! I cannot reach you in that domain,
But even he—'The sweetest lullaby of your
sadder wrongs—boded his wailings by his
life. He who enchants your ears with—

On one side is Erin and Erin,
On the other is the Saxon and the Gael,
seemed to love England even more,
In Erin; he became a Saxon in language,
in habits, and it is said, even in religion. In
his matchless melodies, which have done so
much to keep alive your wrongs, the uplifted
hands are raised, and the voice of Erin
is the voice of Erin. It is a voice of
reveling—unconsciously perhaps—in popu-
lar discontent. The poet did not believe in
the Saxon 'guilt' any more than others, but
loved us so well, guilty and all, as to love
and sing among us. As to your orators and
writers, they have not felt their grievances so
as to unite against them—a sure sign, I
should say, that they do not yet cry to heaven
for vengeance!"—*From "What is to Come."*

HEROISM BEGINS AT A HOME.

We often hear people speak of a heroic
action with a certain surprise at its perform-
ance, not altogether complimentary to the
performer. "He fought himself," they say,
"he surpassed himself," "he was carried
away by a noble impulse." This is not true.
A man does not forget himself in emergency;
he asserts himself, rather; that which is
deepest and strongest in him breaks suddenly
through the exterior of calm conventional-
ities, and for a moment you know his real
nature, you get a measure of his capacity.
But this capacity is not created, as some say,
by the emergency. No man can be carried
farther by the demands of the moment than
his common aspirations and sober purposes
have prepared him to do. A brave man
does not rise to the occasion; the occasion
rises to him. His bravery was in him before
—dormant, but alive; unknown perhaps to
himself, but not to the world. The quality
of our daily living, the quality of our
deeds, our quietness of conviction of duty,
stealthily followed, of patient continuation in
well-doing, of daily victories over self, until
a sudden draft upon us shows what they
have amounted to. We are like water-
springs, whose point-up streams rise with op-
portunity to the level of the fountainhead,
and no higher. A man selfish at heart and
in ordinary behaviour, cannot be useful;
when usefulness would be rewarded openly.
If he will not be useful when he would
be, he cannot be so when he would. It is
not a question of practical for every
hour: What sort of characters are we,
parents and children, forming by every-day
habits of thought and action? Emergencies
are but experimental tests of our strength or
weakness; and we shall bear them not ac-
cording to sudden impulse, but according to
the quality of our daily living. The ac-
cords not to our momentary mood, but to
our whole life. The future America lies in
these little hours.

"Brought forth and reared in hours
Of change, alarm, surprise,
What shall we do to make them sufficient for
the times upon which they have fallen—
Serious for June."

MAY FESTIVITIES.

In some parts of Cornwall May rejoicings
are, or were, distinguished by an unusual
peculiarity. The troublesome rogues who
went about the streets with drums, dis-
turb the sober neighbours, were not
content with doing so, but insisting on a
general holiday, if they discovered any man
working they carried him forthwith to a river,
into which he was obliged to leap or pay
money. In Scotland, on the last of May,
used to be celebrated the Beltane. A small
out in the evening, and a bonfire to hold the
company, a fire kindled and a feast prepared
of eggs and milk. A cake of oatmeal was
also baked on a stone before the fire. The cat-
ter, after preliminary libation, being eaten;
the cake is divided into as many similar
portions as there are persons in the congrega-
tion, one portion being blackened with char-
coal. The portions are then thrown into a
bonnet, and the guests draw handfuls. He
who draws the blackened portion is devoted to
Baal. That this unfortunate was formerly
in the days of Druidism, sacrificed or mur-
dered, there can be little doubt; he is now
only compelled to pass three times through
the flames, making him leap three times the
Baltans signifies the fire of Baal. "The fire"
is used by Milton, speaking in "Paradise
Lost," of the cloud which, "flaming or pushed
with winds rude in the loom."

The word is also used by Spenser, and is
connected with our word tinder. Baal is said
to represent the returning sun reviving
vegetation. Though oatmeal and oatmeal are
alone the proper articles to be consumed on
this holy day, beer and whisky have not un-
frequently been surreptitiously introduced;
occasionally the proceeding is then varied.
Before the oatmeal cake is divided the high
priest of the ceremony breaks off certain
pieces. Some of these he throws into the
fire, with the words, "This I give, O Baal!
preserve my bones." "This I give, O Baal!
preserve my life," and so on. Others he
throws out of the trench saying, "This I give,
O Baal! spare my limbs." "This to thee,
O Hooded Crow!" "This to thee, O Eagle!"
The custom reminds us of a plan
practised in Spain at the present day, when,
singing, three handfuls of grain are re-
served and taken into air, three handfuls
para el amo, para el diaño, for the birds,
the master, and the Giver.—*Dublin Uni-
versity Magazine.*

GYMNASTIC EXERCISES.

Much has been said for and against gym-
nastic exercises. We spent an hour a day,
just before dinner, in the gymnasium. And
this experience causes me to regard these
exercises, judiciously conducted, as essential
to a complete system of education. They in-
duce a vigor, an address, a hardihood, a
presence of mind, in dangers, difficult ac-
complishments without them. While they fortify
the general health, they strengthen the
nerves, and their mental and moral influence
is great. I know that, in my case, they
tended to equalize the spirits, to invigorate
the intellect, and to calm the temper. I left
Hofory, now only perfectly well, but athletic.
—*From "Emmanuel von Fallenberg," in the
Atlantic Monthly.*

BARNEY AND THE BEARS.

The bears in Johnny's were brown bears,
Which Barney was more of a Cooker
than Smith, always introduced to the public
in this way—"Sing! to relate, ladies and
gentlemen, the bear has as many legs as us,
but it don't go a springing on 'em like a
dandy or a dancin' master—it puts its foot
flat to the ground. The bear has likewise
heath like our—its cheek teeth are not
sharp like those of other bears, but prey
on everything it can get on both animal and
vegetable food. But if he do once get a
taste for beef and mutton, it's a case for the
shop, and cattle round about—nothing else
will satisfy him. Poultry and ants and all
kind of small handiwork the bear will gobble,
and it is uncommon food of honey. It will
climb up trees after honey, and with its
sharp claws it grabs up roots. Twigs and
berries and fruits, too, the bear is fond of,
and especially it can get on both animal and
vegetable food. But if he do once get a
taste for beef and mutton, it's a case for the
